

Math Supplies

Grades 7-9

Basic Calculator (Any TI-30 Calculator will do)

Grades 10-12

Juniors will need a TI-84 calculator. This will be used a lot in classes and students will learn how to use it to benefit them when they take the ACT.

Ninth graders would benefit from having a TI-84 calculator, but they are not required to have that calculator until the junior year when they take Algebra 2.
