

Updated [PEIP](#) information on Covid-19.

Costs are fully covered for COVID-19 testing and test-related care. Starting on March 18, we will cover the full costs of a COVID-19 test or testing-related care (such as primary care visit) for you and covered family members. You will not be responsible for any copays, coinsurance, or costs toward your deductible. Remember, COVID-19 testing is limited, so [make sure you meet the requirements](#) and call before you go in for testing.

Reminder: Use free online care for common illnesses or COVID-19 screening. As a part of your benefits you receive free online care visits. This allows you to discuss your condition with a health care provider and make a treatment plan from the safety and convenience of your home, whether it's related to COVID-19 or common illnesses, such as sinus infections. Use your health plan administrator's designated vendor to access these services.

- BlueCross BlueShield members: use [Doctor on Demand](#) or [virtuwell](#)
- HealthPartners member: use Doctor on Demand or virtuwell
- PreferredOne: use [MDLive](#) or virtuwell

PEIP's pharmacy benefit manager, CVS Caremark, has implemented an emergency override that will allow members the option for a one-time emergency refill of a 30-day supply of medication.

[Members can also contact their carrier at the number on their id cards with coverage questions.](#)
