Gene Haas Scholarship

Students going into machining or manufacturing should apply. Experiences in FIRST robotics or other technical programs/work should be highlighted. Gene Haas founded the Gene Haas Foundation and is the owner of Haas Automation, Inc., America's leading builder of CNC machine tools. Haas Automation is now a billion dollar company and this extraordinary growth has all come in an era when Americans were being told that the United States doesn't manufacture anything anymore. Over the next decade, nearly three and a half million manufacturing jobs will likely need to be filled, and the skills gap is expected to result in 2 million of those jobs going unfilled." This scholarship's goal is to build skills in the machining industry by providing scholarships for CNC machine technology students and NIMS credentials.
