

School Forest Survival Presentation

Research

- List 3 resources we read in addition to the novel.
- Some we read together, some you looked up on your own.
- Don't forget to list Shelly Patten (if she comes in!)

Create a Hypothesis

Describe what you expect to happen BEFORE we go out into the woods.

- ✦ Explain how you will use your research to make an educated guess about how you think your experiment in the woods would turn out.
- ✦ Explain how you rely on your past experiences, too.

Procedure

- You will
 - Set up your shelter,
 - Start a fire,
 - Provide yourself water to drink.

A thick dark blue horizontal bar spans the top of the slide. A vertical olive green bar is positioned on the left side, partially overlapping the blue bar. Another olive green bar is located on the right side, below the main title.

Procedure Continued

- Take photos.
- You can do the different stages of completion of your shelter, fire, water.

Materials

- ☐ Make a complete list of everything you will bring with you into the woods (including what you wear).
- ☐ You can have up to five items that you could walk into the woods with. You must carry them on your person -- not in a bag of any type.
- ☐ Tell how many and how much of each object used.
- ☐ The hatchet is NOT one of the five.
- ☐ Striker is one.

NOTE

All items must fit into your pockets!

Charts and Graphs Slide

- Create data using charts, tables, and graphs.
- Use the Graph Club or Inspiration program.
- Choose the correct graphs for your data.
 - Bar-comparison
 - Pie-percentage
 - Line-change/time

After the trip outside you will create a slideshow.

- Did you meet your objectives?
- What did you learn?
- What worked?
- What didn't work?
- What would you do differently next time?

Write a Conclusion

- Write down what you think about your time in the woods.
- Would you add anything to the unit?

Reference the Novels

- You MUST reference the novel in a few slides.
- Cite what Brian did for shelter, fire, warmth, water and compare it to what you did.
- Cite any emotions -- frustration, hopelessness, etc.

Include Pictures and Data

- You will probably end up with nearly 30 slides when you include pictures and the information you filled out in your questionnaire.
