Description of district's efforts to screen and identify dyslexia

St. Charles Public Schools screens students for dyslexia 2 times per year (fall and winter benchmark period) beginning in kindergarten through grade 3. The benchmark assessments though FAST Bridge assess the skills related to a dyslexia diagnosis. If a profile emerges that is characteristic of readers with dyslexia, RTI interventions are determined and implemented prior to a referral to special education for a comprehensive evaluation.

Description of district's efforts to screen and identify convergence insufficiency disorder

Convergence insufficiency is a vision disorder not identified by the typical school vision screens. If a child indicates headache or eye strain while reading for extended periods to a school employee, the information is shared with a parent(s) for possible further screening by an eye care professional. The St. Charles Public Schools makes every effort to alert parents of a possible convergence insufficiency vision disorder if it suspected through our screening process.
