Student Name: _____

IEP Manager: _____

Does this student have any of the services/supports listed below provided by a para during most school days? Nurse: ______

	Yes, mark each service provided and return to Amy Wylde Billable Services as of August 2016 Billable			
Eat	ing – The process of getting food into the body including:	Mobility		
	positioning while eating/transfers	independent. Ambulatory without device		
	food preparation – cutting food/opening containers	using a wheelchair		
_				
	hand washing	can mobilize with the assist of a device, does not need personal assistance		
	application of required orthotics for eating	needs constant physical assistance of another		
	feeding or assistance with feeding	intermittent physical assistance of another		
	receives tube feeding			
Toileting -		Transfers		
	transfers/positioning	standing by to assist if needed		
	assisting with changing of incontinence device (diapers, pull-ups ect)	pivoting the person		
	cleansing/washing/wiping	 need total assist of another, physically unable to participate 		
	inspection of skin (rash, wiped appropriately)			
		two people assisting or using a Hoyer lift		
	adjusting clothing			
	hand washing			
	intermittent supervision, no incontinence			
	constant supervision and assistance			
Gro	boming	ROM/Muscle Exercises		
	hair care/oral care	muscle strengthening/exercises that help to maintain range of motion for		
	care of eyeglasses/hearing aids	the child		
	constant supervision, but no physical assistance	exercises that help with flexibility of muscles		
	physical assistance but child is able to physically participate			
	totally dependent on another for personal hygiene			
Dre	essing	Special Transportation –		
	Intermittent supervision or reminders. May need assistance with fasteners	wheelchair lift		
	applying orthotics	special harness		
	constant supervision but no physical assistance	special vest		
	needs hands-on assistance with clothing fasteners	one-to-one aide on the bus		
	physical assistance but child is able to physically participate	assistance to/from the bus		
		□ care seat		
	totally dependent on another for dressing			
-				
	sitioning	Intervention for seizure disorders – If the student has had a seizure that		
	positioning the student using pillows, wedges or bolsters	requires intervention within the past three months		
	positioning the student using pillows, wedges or bolsters	requires intervention within the past three months		
	positioning the student using pillows, wedges or bolsters repositioning him/her in a wheelchair or bolster chair	requires intervention within the past three months		
	positioning the student using pillows, wedges or bolsters repositioning him/her in a wheelchair or bolster chair physical assistance, but child is able to physically participate totally dependent, child unable to physically participate	requires intervention within the past three months intervention, monitoring and observation 		
	positioning the student using pillows, wedges or bolsters repositioning him/her in a wheelchair or bolster chair physical assistance, but child is able to physically participate totally dependent, child unable to physically participate direction and intervention for Level 1 Behavior, including observation, monite	requires intervention within the past three months		
	positioning the student using pillows, wedges or bolsters repositioning him/her in a wheelchair or bolster chair physical assistance, but child is able to physically participate totally dependent, child unable to physically participate direction and intervention for Level 1 Behavior, including observation, monito ivities of daily living.	requires intervention within the past three months intervention, monitoring and observation 		
	positioning the student using pillows, wedges or bolsters repositioning him/her in a wheelchair or bolster chair physical assistance, but child is able to physically participate totally dependent, child unable to physically participate direction and intervention for Level 1 Behavior, including observation, monito ivities of daily living. <u>f-injurious</u> behavior-causes injury to ones own body:	requires intervention within the past three months intervention, monitoring and observation
